Linux SIG - June 27, 2007

Archiving and Compression

Types of archives

tar

gzip

tar + gzip (tarball)

It is best to zip at the folder level. That way when you unzip, the folder is recreated rather than populating the current folder with the files from the archive

File Roller

Add launcher

Wireless Networking

We'll try to install the wireless USB adapter (again) using ndisgtk and ndiswrapper.

Politics of Linux

Open-source

Source code

Binary/executable program

The GNU Public License

<http://www.gnu.org/licenses/gpl.txt>

Device drivers
