## Linux SIG - Sep 12, 2007

### Scanning and Faxing

#### Scanning

Install libsane-extras

Supported scanners:

<http://www.sane-project.org/sane-backends.html>

Go to Applications -> Graphics -> Xsane Image Scanner

Additional documentation on Xsane is available at:

<http://www.xsane.org/doc/sane-xsane-doc.html>

#### Faxing

Install the efax-gtk package.

Go to Applicatopns -> Office -> Efax-gtk

To enable faxing from the print dialog, open a terminal and enter

```
sudo usr/sbin/lpadmin -p FaxPrinter -E -v socket://localhost:9900
```

## Wireless Tools

Open a terminal

- Display and modify wireless settings. (Note the interface name.)

`iwconfig`

- Get a list of nearby access points

`iwlist interface-name scanning`

- Additional help on both commands is help is available from the terminal:

`man command-name`

- Realtime wireless network monitoring

`wavemon`
