

# Google Chrome (Browser)

Howard Verne  
Revised September 3, 2012  
Add search in setup

9/3/2012 1

## Before we start

- I am from New York and sometimes talk too fast.
  - If needed, please just tell me to slow down or repeat what I just said
- Please Close all open Windows
- Handy Chrome Tutorial
  - <http://googlechrometutorial.com/index.html>
- If you are having problems, raise your hand and a coach will help you.

9/3/2012 2

## Ground Rules -1

- Click/Left Click means single LEFT Click
- Double Click – means double LEFT click
- **Right** Click – means single **RIGHT** click
- *Select* means move mouse over item and single LEFT Click
- *Send Tools/Options* means
  - Move mouse to *Tools*
  - When a submenu appears
    - move mouse to *Options* and left single click
- The screen shots have been "Cropped" and enlarged to show the area of interest. They are NOT, necessarily, the FULL screen shot
  - Windows screens will be different on different computers
  - Yours may have more or less items than these screen shots
- The name of the button/item to select/click appears in *italics*.

9/3/2012

3

## Ground Rules -2

- Turn off your monitor when instructed
  - I will go thru the presentation explaining what we are going to do
  - I will close the presentation, and go thru the process so you can watch (on the projector)
  - I will go back to the presentation and leave the instructions on the screen
  - Turn your monitor back on, when instructed, and follow the steps on the screen

4

# Why Chrome?

9/3/2012 5

## What is Chrome

- Chrome is a Web Browser similar to Internet Explorer (IE)
- It is a *tabbed browser*, like *Internet Explorer*
- It is smaller and faster than *IE*
- It allows *Extensions*
  - Which add to the features available
  - Which slow down Chrome
- It processes web pages differently than IE
  - Malicious code, targeted towards IE, will be ignored by Chrome

9/3/2012 6

# Getting Chrome

Turn off your monitor!

9/3/2012 7

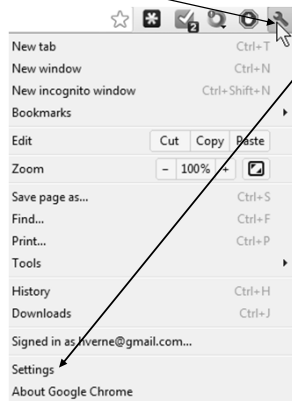

# Downloading Chrome

- Open your browser
  - In the address bar type *www.google.com/chrome*
  - Click on the *Download Google Chrome* button
    - Click on *Accept and Install*
    - If you get a Security/UAC Popup – Select *Run*
- When download is complete
  - Chrome Will Install Automatically
  - Chrome Will Start Automatically
  - Uncheck *Make Chrome your default browser*
  - Click on *Start Google Chrome*

9/3/2012 8

# Setting Up Chrome

- Click on the “Wrench” (Upper Right hand corner), Select Settings

9/3/2012

9

## Howard's Recommended Option Settings -1

	<input type="checkbox"/> Allow in incognito <a href="#">Options</a> <a href="#">Visit website</a>	

9/3/2012

16

## Using Extensions

- To Modify the way an add-on works
  - Click on *Tools/Extensions*
  - Right Click on an *add-on* and select *Options*
- Each time Chrome loads it will check for updates to itself and all your Extensions.
  - If you have a lot of Extensions, this may slow down time to start Chrome

9/3/2012

17

## Chrome Tips

- To change size of display
  - Control + Middle Mouse Wheel
  - Control + or Control –
  - Control 0 resets size
- If you are viewing a secure/encrypted site, a padlock appears at the extreme right of the address bar

9/3/2012

18

# Web Of Trust (WOT)

- You DO have to be registered to rate sites
  - You do NOT have to be registered to just use extension
  - Note rating of sites next to each link in this google search
